

# Marketing Internship

## Internship Description

Fizyr is looking for a highly skilled intern with a growth mindset to join the marketing team. You will assist in the development and implementation of Fizyr's marketing strategy and communication of our brand messages to prospects in our sales channels to create a dialogue between our company and large international (potential) customers.

This internship allows you to grow personally and further develop yourself along with the planned fast international growth of the company. Fizyr has a flexible way of working in line with personal choices. Our team of highly skilled people consists of multiple nationalities, so our communication language is English. You should be prepared to work in a fast-paced environment and will finish the internship having gained broad experience in various aspects of marketing.

During the internship, you get coaching and support from experienced people in marketing management and sales tactics, including the CEO and marketing assistant. You will collaborate on the marketing strategy and sales channels to further grow Fizyr in a rapidly growing market.

## (Y)our challenge

Like providing autonomous driving software to Mercedes, Volkswagen and Ford, our software is used by THE major system integrators in logistics for autonomous picking. We know all 90 global potential clients and we gently 'guide' their DMU's towards evaluating and using our software.

## Activities

- Assist in the creation, preparation and distribution of marketing materials
- Provide support to social media efforts (organic and paid)
- Research competition activities and marketing tactics
- Research trending topics in the industry to utilize on our channels
- Mapping of different stakeholders, such as end users, system integrators, hardware vendors and journalists.

## Requirements

- 3rd or 4th year student of a higher professional education Commercial Economics, Marketing or Communication.
- Excellent verbal and written communication skills (C1 level or higher).
- You can work independently and in groups within an international work environment.
- You feel at home on multiple social channels
- Ability to take direction and multi-task
- Driven to develop something and especially roll it out in practice and see immediate

## About Fizyr

Fizyr creates a standard vision software to handle objects varying in shape, size, color, material and how they are stacked. Through our deep learning algorithm, robots learn to recognize and pick unknown objects autonomously. Equipping robots with Fizyr software frees hands from repetitive tasks and speeds up automated processes.

Fizyr is a young, fast-growing company recognized by world-class partners for the capabilities of our algorithms. We recently secured funding from a respected high-tech venture capital investor. To fulfill the high expectations of our customers, we offer an internship in an exciting, high-tech environment with an enthusiastic team of highly skilled experts. We are close to the research community and work on applications of state-of-the-art computer vision technology. Our applications work in production at large parcel services and e-commerce warehouses as well as a variety of other industries.

## How to Apply

Students interested in this internship position are invited to send their CV and motivation letter to [career@fizyr.com](mailto:career@fizyr.com).
