

Product Owner

About Fizyr

Fizyr integrates vision software into robot systems to handle objects varying in shape, size and colour. Through our deep learning algorithm, robot systems learn to recognize unknown objects autonomously. Equipping robots with Fizyr frees hands from repetitive tasks and greatly speeds up automated processes.

Under the name Delft Robotics (precursor of Fizyr) we ranked first in both the picking final and stowing final of the prestigious Amazon Picking Challenge in 2016, establishing our solution at the forefront of cognitive technology.

The opportunity

We are a young and fast-growing company. We are recognized by world-class partners for the capabilities of our algorithms. To fulfil the high expectations of our customers, we are looking for a Product Owner to expand our team of bright minds.

We offer a job in an exciting, high tech environment within an enthusiastic team of highly skilled experts. We are close to the research community and work on applications of state-of-the-art computer vision technology. Our applications work in production at large postal services and e-commerce warehouses as well as a variety of other industries.

Together with a team of software developers, computer vision engineers and deep learning experts you will be working on creating software solutions to be implemented on the robots of our global industry partners. Additionally, half of all our development is on expanding our internal toolset which enables current and future projects.

Function description

At any time, there are numerous ongoing projects within Fizyr. These may vary from continues internal development to large projects for customers (>6 months) to small customer related pilot projects (~ 3 weeks). Together with the team you will be responsible for determining the projects deliverables, as well as roughly planning the effort. You will be the customers point of contact for many of these projects and guide the process towards delivery.

Activities

Because of the large variety of your tasks, no day will be the same:

- Together with the team and the clients you will formulate deliverables and project outlines.
- You will be end responsible for the operational development processes.
- For projects you will be the point of contact for the clients.
- You will coach, motivate, evaluate and distribute responsibilities over the development team (8 developers and growing).
- Together with the CEO you will define project proposals.

You are

- A people manager that is motivated to get the most out of an excellent development team, with both management and coaching skills.
- Pragmatic in translating requirements into achievable development goals.
- Have a technical background and is interested in the inner mechanics of 3D-Vision, Robotics and Artificial Intelligence, and can facilitate critical technical decisions.

How to apply?

Candidates interested in this job opening are invited to send their CV and motivation letter to career@fizyr.com
