

# Project Manager

## The job

As a member of the customer success team, you work closely together with project engineers, manufacturing teams of integrators and end users that are applying Fizyr solution to solve their automation challenges. You are responsible for planning and overseeing our projects to ensure they are completed in a timely fashion and within quality and budget. You will plan and designate project resources, prepare budgets, monitor progress, and keep stakeholders informed the entire way. This needs to be all done within the confines of Fizyr's goals and vision.

## Your work

- Determine and define project scope and objectives
- Predict resources needed to reach objectives and manage resources in an effective and efficient manner
- Prepare budget based on scope of work and resource requirements
- Track project costs in order to meet budget
- Develop and manage a detailed project schedule and work plan
- Provide project updates on a consistent basis to various stakeholders about strategy, adjustments, and progress
- Manage contracts with vendors and suppliers by assigning tasks and communicating expected deliverables
- Utilize best practices, techniques, and standards throughout entire project execution
- Monitor progress and make adjustments as needed
- Measure project performance to identify areas for improvement
- Build relationships with manufacturing teams of integrators and end users

## Who are we looking for?

You are a passionate self-starter and like working with people from all over the world. You feel at ease communicating in English, both verbally and written. You can work on your own or within a team. Obviously, you are analytical, good with people and like problem-solving. You are driven by the positive influence that change brings along. Innovation and achieving goals drive you, an inspiration that gives you energy and meaningfulness.

## Requirements

- Bachelor's degree in computer science, business, or a related field
- 4-8 years of project management and related experience or comparable management role
- Proven ability to solve problems creatively
- Strong familiarity with project management software tools, methodologies, and best practices
- Experience seeing projects through the full life cycle
- Excellent analytical skills
- Strong interpersonal skills and extremely resourceful
- Proven ability to complete projects according to outlined scope, budget, and timeline
- Professional fluency in English, additional languages are a plus.
- Willing to travel for helping customers worldwide.
- Ability to run a project taking care of the goals of all the stakeholders involved.
- Ability to work or lead in groups and cross functional teams.

## Nice-to-have

- Project Management Professional certification preferred
- Experience with software implementation projects
- Experience in industrial automation
- Experience in Logistics

## About Fizyr

Fizyr designs, builds, installs, and maintains the world's best vision software product for automated picking and placing in harsh logistics environments. Our deep learning algorithms are used to enable automated handling of unknown objects varying in shape, size, color, material, and stacking, being picked from (conveyed) bulk. Fizyr's product is applied in production all over the world by leading system integrators and end-users, in online retail, warehousing and parcel services. By equipping robots with our software, we manage to free human workers from repetitive or dangerous tasks and to speed up automated processes.

We are a young, fast-growing company recognized for the high quality and capabilities of our algorithms worldwide. To fulfil the growing demands of the logistics industry, we recently secured additional funding from a respected high-tech venture capital investor. Up to this day, we remain dedicated to creating true value for our partners, so that they can create cutting-edge logistics solutions for their clients.

Our international team of highly skilled experts creates a very exciting, high-tech environment to work in. We have a passion for what we do and challenge each other to deliver high quality results, without forgetting to enjoy quality time together. Fizyr is also close to the research community and works on applications of state-of-the-art computer vision technology.

### The Opportunity

Together with other members of customer success team you will be working with teams from our integrators and end users on implementing our software on the robots of our industry partners. You will have an influential role in the implementation of our software. Key challenges currently being faced include scaling up the number of onboarding robotic- and system integrators, optimizing pre-production systems and commissioning production ready systems. The job allows you to grow personally and further develop yourself along with the growth of the company. Fizyr has a flexible way of working in line with personal choices. Fizyr is a recognized sponsor for regular labor and highly skilled migrants.

The salary for this position strongly depends on your experience. Indication: €70k gross per year, pension plan, travel expenses, training opportunities, etc. As a fast-growing scale up, Fizyr has an attractive stock option plan.

### How to Apply

Candidates interested in this job opening are invited to send their CV and motivation letter to [s.bos@fizyr.com](mailto:s.bos@fizyr.com).
